### TROPICAL CYCLONE BULLETIN NO. 3

#### Tropical Depression "NANDO"

Issued at 11:00 AM, 09 October 2021

Valid for broadcast until the next bulletin at 5:00 PM today

HAZARDS AFFECTING LAND AREAS
The tropical depression is unlikely to directly affect the weather condition in the country within the forecast period.
HAZARDS AFFECTING COASTAL WATERS
The tropical depression is unlikely to directly affect the sea conditions over the coastal waters of the country within the forecast period.
TRACK AND INTENSITY OUTLOOK
<ul style="list-style-type: none"><li>Both "MARING" and Tropical Depression "NANDO" are presently embedded within the larger circulation of a monsoon depression. "NANDO" is forecast to move generally west southwestward as it interacts with the circulation of "MARING". During this period, "NANDO" may likely be assimilated and merged into the circulation of "MARING".</li><li>Considering the trend of changes in the forecast scenario in previous bulletins and the uncertainty surrounding the interaction and merger event between "MARING" and "NANDO", there is a moderate to high likelihood that changes may still occur in the track and intensity outlook for this tropical depression in the next bulletin.</li></ul>

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless superseded by an intermediate bulletin the next tropical cyclone bulletin will be issued at 5:00 PM today.
